MASS TRANSIT

The Challenge

We envision mass transit system benefiting from the processes, data, connected vehicles communicating with each other. A new way where monitoring and reporting is reliable on every bus stop and stations connected with operation centers having greater visibility throughout the system.

The Solution

Our Mass Transit solution provides a central platform to manage all their mobile, kiosk or devices used for mass transit and making the tasks of provisioning terminals and managing and servicing them easier.

With available data - real-time monitoring, location-based services, and fleet management provide greater efficiency and better asset management with reduced operating and maintenance costs. Make faster and more informed decisions and create a safe and more enjoyable way for passengers to travels with added services for greater mobility.

Lahore Transport Company (LTC), a Lahore-based public transit bus system, accepted our cashless payments for its mass transit customers to make daily commute payments using their linked bank accounts.

The Benefits

Our core products for digital transformation in transportation services are extended for .

 **Mass Transportation**
 **Taxi**

 **Parking**
