PROPERTY MANAGEMENT

The Challenge

Property players are tapping into a more broad and global market, creating a new digital “ecosystems” lead by the curated economy. With a great potential to transform the conventional property management into “a digital business” – simply by operating the ecosystem. Managing the portfolio smoothly from initial viewings through to ending tenancies is always a challenge.

The Solution

Gurfati – a property management solution built by people in the business who understand the needs of landlords and property managers. It brings property managers, tenants, contractors, agents and owners together in one place.

It offers an extensive management of individual properties and provide listing services like Zameen.com, Booking Services like Booking.com / AirBnB, Online Rent and Property Sell. The solution also provides CRM for real estate brokers / agents.

The functionally rich mobile apps provide the same degree of the functionality found on the PC web, ensuring managing tenancies on the go has never been easier. It's accessible anywhere at any time giving you freedom and flexibility in how you manage your properties.

The Benefits

It allows creation of automated tasks and communications to ensure everything is covered and automatically carried out throughout the process, of tenants moving in to tenants leaving and everything in between.
